Making Learning Happen
A Guide for Post-Compulsory Education

Phil Race

Contents

Chapter 1 Setting the Scene
Why this book?
Minding our language
A short tour of the territory
Trying to sort out the picture
Conclusions

Chapter 2 Five factors underpinning successful learning
Background
Towards the factors underpinning successful learning
So how do these five factors work together?
Making learning happen by addressing the five factors
Thinking further about teaching
Are there any more ‘ripples’?
So where does ‘understanding’ come in?
A ‘slice’ of the pond?
Conclusions

Chapter 3 Beyond learning styles?
No hidden agendas!
Analyse how you learn
A: Wanting to learn, self-motivation
B: Needing to learn: taking ownership of the targets
C: Learning by doing: practice, trial-and-error, repetition
D: Learning from feedback: other people, scores, marks, grades
E: Making sense of what I’m learning – getting my head round it
Providing feedback on respondents’ decisions
Putting learning through feedback to work
To score, or not to score?
Self-evaluation questionnaire scoring grids
Helping learners to make learning happen

Chapter 4 Assessment driving learning
Why assessment counts
Does assessment bring out the best – or the worst – from our learners?
‘I’m sorry, but I haven’t got a cue!’
What’s wrong with assessment?
Why is now the time to move towards fixing assessment?
Who owns the problem of fixing assessment in post-compulsory education?
How can we fix assessment?
So what can you do to fix assessment?
Linking assessment processes to the factors underpinning successful learning
What other assessment choices could we think about?
Towards assessment becoming a better driver for learning
Chapter 5  Learning through feedback
Feedback or feed-forward?
Feedback, achievement and failure
Varieties of formative feedback
Problems about giving feedback to learners
Feedback, efficiency and learning payoff
Maximising learning payoff through formative feedback
Risk assessment and feedback
Feedback for high fliers and for low fliers
Formative feedback, and summative feedback
Designing feedback in response to poor work
Using feedback to make learning happen: twelve ways forward

Chapter 6  Making learning happen in large groups
Learning by finding out the answers to questions
What is a large group?
How can we get learners to ask questions in large groups?
How can we enable learners to get answers to their questions in large-group sessions, without the
sessions being monopolised by a few vociferous learners?
How can we manage inappropriate behaviours in large groups?
What kinds of classrooms make large-group teaching a nightmare?
How can you help individuals to be heard in large group sessions?
What do learners do that hinders learning?
What do lecturers do that hinders learning?
How can technology help to make learning happen in large groups?
How can handouts be properly used in large groups to support learning?
How can we help learners to make meaningful records of learning in large groups?
How can we ensure that learning in large groups is inclusive?
What’s the difference between the kind of learning in a large group, and that which goes on in
tutorials, seminars or problem classes?
What are the drivers of genuinely interactive learning in large groups?
What kinds of briefing do learners need to help them understand how best to learn in large-group
contexts?
What kind of groundrules should be established for large group learning?
Whose responsibility is it to make learning happen in large groups?
Why do we have large groups anyway?
What can we do to enhance the want to learn in large groups?
How can we clarify the need to learn in large groups – shared standards, putting outcomes to work?
What can we get learners to do in large groups?
What can we do in large groups?
How best can we make use of large groups as a feedback-rich environment?
How can we help learners to make sense of things in large-group contexts?
Why does large-group learning always have to take place on campus? Courtrooms, exhibitions,
sports arenas, Trafalgar square, ...
How can we help learners to follow up their learning from lectures?
Summing up: making lectures unmissable!
Twenty suggestions for making learning happen in large groups
Chapter 7 Making learning happen in small groups
What sorts of small group teaching are there?
How can we shut the teacher up in small groups?
What tutor behaviours are least likely to make learning happen in small groups?
What tutor behaviours really make learning happen in small groups?
How big is a small group?
Where can small-group learning happen?
How can we ensure in small groups that learners don’t feel marginalised, alienated and ignored?
Under what circumstances does deep learning happen in small groups?
What kinds of imperatives mitigate against effective small-group learning?
What duration is ideal for small-group sessions?
Why can’t learners lead small-group learning sessions?
What institutional factors make small-group learning really difficult?
What can we do to help learners to want to learn in small groups?
How best can we use small-group contexts to clarify the learning need?
What actions do learners learn most from in small groups?
How best can we maximise the feedback learners get from each other in small groups?
What kinds of challenges can we offer learners in small-group teaching?
Why do we persist in pretending that small group teaching is as good or better than other methods?
What can learners do to ensure they learn nothing in small groups?
How can we manage behaviours which prevent learning in small groups?
Where is the real learning payoff in small-group teaching?
What exactly are we trying to do in small groups?
Why use small-group teaching at all?

Chapter 8 Responding to diversity and widening participation
Differentiation
Perceived staff needs in the context of widening participation and student diversity
How students are changing
Responding to special needs
Special needs and ‘wanting’, ‘needing’, ‘doing’, ‘feedback’ and ‘making sense’
Hidden and visible disabilities
Conclusions

Chapter 9 Addressing employability
What do we mean by employability?
How can we help learners to show that they are employable?
How can we help learners to feel that they are employable?
Should we also be preparing learners for ‘unemployability’?
Developing employability by building on learners’ own experiences
Mapping aspects of employability
Linking learning to employability
Striking the balance between independence, collaboration and followership
Conclusions: five factors underpinning successful employability?
Chapter 10 Putting the learning into e-learning
What’s wrong with e-learning?
What’s so special about e-learning?
Learning from e-learning experience
When does e-learning presently work well – and badly?
Learning from screens
Is this screenful actually working?
Interrogating e-learning: a checklist
Yet more questions to interrogate e-learning
Towards a strategy for designing the learning into e-learning
Conclusions

Chapter 11 Making workshops work
Rationale for this chapter
The wider picture of ‘making learning happen’
Effective training is about effective learning
Planning to make learning happen
Making ‘learning-by-doing’ happen
Creating an active learning environment – room layout
Finding out how it really went
Reflecting on your workshop
